PRESS RELEASE

ROSS CONTROLS® Announces New Safety Valve Selection Tool

TROY, MI – May 2018 – ***ROSS Controls® the Global Leader in Pneumatic Safety Valves, introduces its new Safety Valve Selection Tool***

The Safety Valve Selection Tool will simplify your process of selecting the best product to fit your application, independent of your familiarity with Safety Valves and ROSS Controls.

Nine different safety application categories are included with approximately 2,000 total product possibilities. Categories include Energy Isolation, Safety Exhaust, Safe Cylinder Return, Load Holding, Press Control, Soft Start, Hazardous Locations, and Broken Hose Protection. To help your navigation, additional product feature explanations are available throughout the process.

This new tool is available at ROSS' website and can be used from a PC, tablet, and smart phone. After a final selection is made, you can click on a link to that product's website catalog page to download additional information including data sheet, technical documentation, and 3D models.

For more information on the ROSS® Safety Valve Selection Tool contact ROSS Control or visit ROSS' website.
