FOR IMMEDIATE RELEASE

ROSS CONTROLS® Announces Expanded Dale Valve Series

(TROY, MI – August 25, 2015) – ROSS Controls, Troy MI, introduces an expansion to its existing Dale Valve Series for applications including Leak and Flow Testing, Vacuum Pick & Place, Packaging and Impregnation, Blow Molding & Thermoforming, and Isolating & Holding.

The ROSS Dale Valve CX series is now available in ¼” ports and flows up to 250 psi. These valves still allow Bi-Directional Flow, are port pressure independent, can be individually mounted in-line or on stackable manifolds to eliminate piping, and has a dirt tolerant poppet design.

The new ROSS Dale Valve LT series is designed for Leak Tight applications and also flows up to 250 psi. This 3 valve manifold can be field configured for flow, pressure decay, or differential pressure testing by selecting different combinations of the three sensor ports.
