**FOR IMMEDIATE RELEASE**

**ROSS CONTROLS® Announces BG Certification for M DM<sup>2</sup>® C Series Valves**

(TROY, MI – October 1, 2015) – ROSS announces their M DM<sup>2</sup>® Series C valves are now BG Certified per the DIN ES ISO 138491 PL e standard. These valves are intended to be used in Fail-safe Energy Isolation applications (non-Press Brake/Clutch).

The third party assessment and certification was performed by DGUV Test who is regarded as one of the approved bodies for Machinery and Safety Components according to EC-Machinery Directive 2006/42/EC and German Product Safety Act.

The ROSS Category 4 Control Reliable Energy Isolation Valve M DM<sup>2</sup>® C Series incorporate proven DM<sup>2</sup>® C dynamic monitoring with memory technology combined with modular connectivity and an integrated soft start to adjust the buildup of system pressure for added safety. M DM<sup>2</sup>® Series C valves can be installed separately or with a lockout valve and filter regulator as part of an air entry package.

Control Reliable Energy Isolation Valves enable rapid exhaust of downstream air when de-energized to remove stored energy and allow safe access to work areas. The M DM<sup>2</sup>® Series C Valve is the latest addition to the ROSS' Energy Isolation Valve family that covers a wide range of sizes.
